

Flux Treatment **IRONless**

Designed,
developed and
made in Germany

**State-of-the-art technologies for pre-treatment.
Over 15 years of experience.**

- compact design
- L x B x H (mm): ca. 4500 x 3500 x 3400
- various flexible setups possible
- powerful hybrid batch process
- two reaction tanks for high performance
- intuitive operation
- automatic ph-value adjustment
- integrated platform

Your advantages:

- extremely low iron content in the flux
- less zinc ash and dross
- reduction of zinc consumption
- nearly unlimited service life
- less rework
- reduction of chemical and energy consumption
- increase in quality
- constant bath level
- filter press directly over waste container
- full commissioning and training
